

COVID-19 Update

We are thrilled to announce that we are back to seeing patients full time while continuing to follow all of the new protocols to provide safe dental care to all of our wonderful patients.

Our office may look a little different these days due to some changes made to protect staff and patients. Here are some examples of changes we made for your safety:

- Pre-screening all patients via phone as we confirm appointments and again when entering our office
- Limiting the amount of patients in the office at any given time
- Adding HEPA filters to limit aerosols in the treatment rooms and reception area.
- Requesting that all patients wear masks in our office until their treatment begins.
- Adding additional PPE that our staff will be wearing including fit tested N95 respirators, face-shields and disposable gowns.
- Checking the temperatures of all patients and staff upon entering the office
- Installing a plexiglass shield at the reception desk
- Setting up a hand sanitizer station at the front door

Although the office may look different, we are still committed to providing excellent, safe dental care. We cannot wait to see all of our patients at their upcoming appointments.
